

education

master | control engineering

tsinghua university | 2015-2018

- research: deep learning optimization, human pose estimation, object detection, face detection, face alignment, face recognition.
- advisor: Lei Zhang

bachelor | instrument and measurement science

kunming university of science and technology | 2008-2012

- concentration in control theory

teaching

tsinghua | student instructor

april 2018 - july 2018

Big Data class in Tsinghua University, covering the following topics

- Developed deep learning experiments for the class, including optimization methods, GAN models and object detection algorithms.
- Designed quizzes, exams, and homework for the class.

skills

programming languages

python • c++

machine learning

algorithms

- Object Detection
- Human Pose Estimation
- Facial Detection and Recognition
- Deep Learning Optimization

frameworks

pytorch • tensorflow • Caffe • keras • MXNet • ONNX • TensorRT • GlueCV

deep learning deployment

Docker • Kubernetes • Jetson Xavier • Jetson Nano

general

languages

english • chinese

software

LaTeX • photoshop

os

linux • mac • windows

experience

aifi inc. | senior research engineer (computer vision)

february 2020 - present

- Ownership of all computer vision detection algorithms and services in the RGB-only auto-checkout solution (Similar to Amazon Go with only RGB cameras deployed).
- Prototype computer vision algorithms in RGB-only auto-checkout solution (includes customer-tracking and product-tracking).

june 2018 - january 2020, research engineer

- Developed the customer-detection algorithm based on MASK-RCNN and Openpose in the customer-tracking system.
- Developed the product-detection algorithm based on CenterNet in the product-tracking system.
- 2019 **Super Special Bonus** due to outstanding contribution to the auto-checkout solution.

the hong kong polytechnic university, hongkong | research assistant

october 2016 - april 2018

- Developed PID optimizer to accelerate the training of CNNs.
- Developed the PolyU-Face system (face detection, alignment, recognition).

taiyuan iron and steel corporation, china | control technician

july 2012 - september 2014

- Focused on tuning the parameters of PID controller in the steel milling machine.

publications
