

education

master | control engineering

tsinghua university | 2015-2018

- research: deep learning optimization, human pose estimation, object detection, face detection, face alignment, face recognition.
- advisor: Lei Zhang

bachelor | instrument and measurement science

kunming university of science and technology | 2008-2012

- concentration in control theory

teaching

tsinghua | student instructor

april 2018 - july 2018

Big Data class in Tsinghua University, covering the following topics

- Developed deep learning experiments for the class, including optimization methods, GAN models and object detection algorithms.
- Designed quizzes, exams, and homework for the class.

skills

programming languages

python • c++

machine learning

algorithms

- Object Detection
- Human Pose Estimation
- Facial Detection and Recognition
- Deep Learning Optimization

frameworks

pytorch • tensorflow • scikit-learn
keras • caffe • MXNet • GluonCV

deep learning deployment

Docker • Kubernetes • Jetson Xavier •
Jetson Nano

general

languages

english • chinese

software

LaTeX • photoshop

os

linux • mac • windows

experience

aifi inc. | research engineer

april 2017 $\xrightarrow[\text{time}]{\text{part}}$ june 2018 $\xrightarrow[\text{time}]{\text{full}}$ present

- Developed the AiFi-Detection system based on MASK-RCNN and Openpose.
- Propose and changed the AiFi-Tracking System from body detection to head detection, improved more than 10% accuracy.

the hong kong polytechnic university, hongkong | research assistant

october 2016 - april 2018

- Developed PID optimizer to accelerate the training of CNNs.
- Developed the Computing-Face system (face detection, alignment, recognition).
- Developed computer vision algorithm in the construction site, published two top journals in the construction field.

taiyuan iron and steel corporation, china | control technician

july 2012 - september 2014

- Focused on tuning the parameters of PID controller in the steel milling machine.
- Concentration on the control system improvement of the steel milling machine at Mitsubishi factory, Hiroshima, Japan.
